

BURN POT 250-00128

INSTALLATION INSTRUCTIONS

Replaces MPNs: 250-00128, 99300171

Before Installing

- **ALWAYS** unplug the unit before beginning any work
 - Allow the unit to cool completely if recently used
 - Work in a well-lit area with proper tools
-

Installation Steps

1. Disconnect Power

- Ensure the unit is completely cooled down and drained of power.
- Unplug the stove from the power source.

2. Access the Unit

- Locate the burn pot on the stove. The burn pot typically sits in the front of the stove in the main burning area.
- Open the stove's main door to access the burn pot.

3. Remove Old Burn Pot

Pull the old burn pot from the burn pot holder.

5. Install New Burn Pot

- Insert the new burn pot into the burn pot holder.
- The large hole must face toward the igniter tube at the back of the firebox.
 - The assembly is made so it will only drop into place if the fire pot is turned to that position

6. Connect Power

- Close the stove door.
 - Plug the stove's power cord into the power source.
 - Your new burn pot is installed and ready to use.
-

Post-Installation Check

- Verify if the burn pot is sitting properly in the holder before closing the door.
 - Ensure the burn pot is oriented correctly in the holder.
 - Verify if the pellets are burning properly in the burn pot.
 - Be careful not to touch the burn pot while operating the stove, allow the unit to cool completely before making any adjustments.
-

Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our contact form.
