

CONVECTION BLOWER 3-21-33647

INSTALL INSTRUCTIONS

Replaces MPNs: 3-21-33647, 3-21-22647

Before Installing

- **ALWAYS** unplug the unit before beginning any work
 - Allow the unit to cool completely if recently used
 - Work in a well-lit area with proper tools
 - Ensure there are no pellets in the hopper assembly
-

Installation Steps

1. Unplug the stove from power
 2. Remove any necessary access panels to access the mechanical cabinet in the back of the stove.
 3. Locate the old blower on the stove and disconnect the wires leading away from it to the wiring harness
 4. Using a 3/8" socket driver, remove the two screws holding the old blower in place
 5. Install the new blower in place of the old blower, securing it in place with the same hardware
 6. Reconnect the wires (white to white, and black to the other corresponding color). Make sure to reattach the green grounding wire if there is one
 7. secure any loose wiring with zip ties.
 8. Reattach any removed access panels.
 9. Plug in the stove.
-

Post-Installation Check

- Verify all connections are secure
 - Ensure all wiring is not in proximity of moving parts
 - Test motor operation before closing panels
 - Check for any unusual noises or vibrations
-
