

SHAKER GRATE 40349

INSTALLATION INSTRUCTIONS

Replaces MPNs: 40349

Before Installing

- **ALWAYS** unplug the unit before beginning any work
 - Allow the unit to cool completely if recently used
 - Work in a well-lit area with proper tools
-

Installation Steps

1. Disconnect Power

- Ensure the unit is completely cooled down and drained of power.
- Unplug the stove from the powersource.

2. Access the Unit

Open the main door to the unit. The grates will be sitting on the inside of the stove firebox.

3. Remove Old Grate

- Prior to disassembly, take clear photos of the orientation of the grate for reference. The new grate will need to be oriented in the same position as this old grates once installed.
- Pull the shaker grates off of the frames and out of the unit. Two grates that interlock are typically used for these units.
- Disconnect the two frames from each other. If replacing both grates, bypass this part and proceed to the next step.

4. Install New Grate

- Insert the lug of the new grate into the slot in the end of the other grate to interconnect them.
- Insert the grates into the unit and place them on the shaker frame. Ensure the grate assembly is oriented so the lug of the grate points toward the door and the arched side of the grates face upward. This will be where the shaker handle connects when operation is needed.

5. Connect Power

- Close the main door of the stove. Ensure the door is sealed when closed.
 - Plug the stove's power cord into the power source.
 - Your new shaker assembly is installed and ready to use.
-

Post-Installation Check

- Verify all connections are secure
 - Test the seal of the door to ensure proper fitment. The door should be sealed tightly when both the handle is secured and the gasket is at proper thickness.
 - Check the grates to ensure they interlock properly and turn smoothly when operated before final assembly.
-

Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our contact form.
