

BURN POT GRATE 54261

INSTALLATION INSTRUCTIONS

Replaces MPNs: 54261

Before Installing

- **ALWAYS** unplug the unit before beginning any work
 - Allow the unit to cool completely if recently used
 - Work in a well-lit area with proper tools
-

Installation Steps

1. Disconnect Power

- Ensure the unit is completely cooled down and drained of power.
- Unplug the grill from the power source.

2. Access the Unit

- Locate the burn pot in the grill. The burn pot is mounted in the center of the grill cooking area with the burn pot grate typically mounted inside the burn pot.
- Remove the cooking grates, drip pans, broiler plates or baffles from the grill to gain access to the burn pot and igniter inside the grill.

3. Remove Old grate

The burn pot grate will be sitting inside the burn pot. Simply pull out the grate from the top of the burn pot.

5. Install New Igniter

- Insert the new burn pot grate into the burn pot. The hole in the burn grate should align and be open for the igniter to light the pellets.

- Ensure the curved lip of the burn grate is flush with the top of the burn pot, and the notched side should sit flush under the fuel deflector to verify proper fitment.

6. Connect Power

- Install the removed cooking grates, drip pans, broiler plates or baffles to the grill.
- Plug the grill's power cord into the power source.
- Your new igniter is installed and ready to use.

Post-Installation Check

- Verify all connections are secure
- Test igniter operation before final grill assembly. The igniter should visually glow red hot and emit heat.
- Be careful not to touch the igniter rod while testing or operating, allow the unit to cool completely before making any adjustments.

Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our contact form.
