

CONVECTION BLOWER 80709

INSTALL INSTRUCTIONS

Replaces MPNs: 80709

Before Installing

- **ALWAYS** unplug the unit before beginning any work
 - Allow the unit to cool completely if recently used
 - Work in a well-lit area with proper tools
 - Ensure there are no pellets in the hopper assembly
-

Installation Steps

1. Unplug the unit and make sure it is cool to the touch.
 2. Remove the necessary panels from the unit to allow access to the convection blower (You may need to remove the side panel in addition to the rear panel).
 3. Disconnect the power wires leading to the blower.
 4. Remove the screws attaching the blower housing to the unit (Pay special attention to the orientation of the blower and any grommets/spacers. The replacement blower needs to be positioned in the same way).
 5. Position the new blower assembly in place and reinstall the previously removed screws.
 6. Reconnect any previously removed power wires.
 7. Reinstall any previously removed panels and plug in the unit.
-

Post-Installation Check

- Verify all connections are secure
- Ensure all wiring is not in proximity of moving parts

- Test motor operation before closing panels
 - Check for any unusual noises or vibrations
-

Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our [contact form](#).
