

POWER FUSE CB-FUSE INSTALL INSTRUCTIONS

Replaces MPNs: 720114, CB-FUSE

Before Installing

- **ALWAYS** unplug the unit before beginning any work
 - Allow the unit to cool completely if recently used
 - Work in a well-lit area with proper tools
 - Ensure there are no pellets in the hopper assembly
-

Installation Steps

1. Unplug the power cord from the main power switch at the rear of the stove.
 2. Locate the small plastic tab at the top of the plug housing.
 3. Using a small flat head screwdriver pull the tab backward (This should allow the fuse tray to pull free).
 4. Once the tray pulls free identify which fuse you want to replace. (The active fuse sits towards the front in the saddle seat. The backup fuse is tucked inside the plastic sleeve just behind it.)
 5. Replace the fuse and slide the tray back into place.
-

Post-Installation Check

- Verify all connections are secure
 - Ensure all wiring is not in proximity of moving parts
 - Test motor operation before closing panels
 - Check for any unusual noises or vibrations
-

Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our [contact form](#).
