

# H7917

## Convection Blower

### INSTALLATION INSTRUCTIONS

---

#### Before Installing

- **ALWAYS** unplug the unit before beginning any work
  - Allow the unit to cool completely if recently used
  - Work in a well-lit area with proper tools
- 

#### Installation Steps

##### 1. Power Disconnection

Unplug the unit from the power source.

##### 2. Disconnect Blower Wiring

Disconnect the blower's male wiring molex connector from the blower control box's female connector receptacle.

##### 3. Remove Old Blower

- Remove the 4 mounting bolts that fastens the blower assembly to the stove.
- Remove the old blower assembly from the rear of the stove.

##### 4. Install New Blower

Install your new blower assembly to the stove with the previously removed bolts.

##### 5. Connect Wiring

Connect the new blower's male molex connector to the blower control box's female connector receptacle.

##### 6. Power Connection

Plug the stove back into the power source.

---

## **Post-Installation Check**

- Verify all connections and fastenings are secure
  - Test blower operation to ensure proper functionality
  - Check for any unusual noises or vibrations
- 

## **Support**

If you encounter any issues during installation, consult your owner's manual or contact technical support via our contact form.
