

# KIT0411

## Induction Fan

### INSTALLATION INSTRUCTIONS

---

#### Before Installing

- **ALWAYS** unplug the unit before beginning any work
  - Allow the unit to cool completely if recently used
  - Work in a well-lit area with proper tools
- 

#### Installation Steps

##### 1. 1. Power Disconnection

Unplug the unit from the power source.

##### 2. Access the Unit

Open the service panel to access the induction fan.

##### 3. Locate Induction Fan

This fan can be found in the mechanical area inside the hopper burner assembly (removal of the wiring access panel may be required to access this fan).

##### 4. Disconnect Wiring

Unplug the fan Molex connector from the control board.

##### 5. Remove Old Fan

- Remove the 4 mounting screws that hold the Traeger fan motor in place.
- Pull the fan out of the motor area from underneath the hopper.

##### 6. Install New Fan

- Install the replacement fan using the original 4 mounting screws.

- **This fan motor is NOT used on Timberline grills (gen 2) that use a D2 controller.** These models use fan part KIT0353 instead.

## 7. Connect Wiring

Plug the new wire Molex connector into the controller.

## 8. Final Assembly

Reinstall and secure the removed access panel.

## 9. Power Connection

Plug in the grill back into the power source.

---

## Post-Installation Check

- Verify all connections are secure
- Test blower operation before closing panels
- Check for any unusual noises or vibrations

---

## Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our contact form.
