

P-1074

Distribution Fan

INSTALLATION INSTRUCTIONS

Before Installing

- **ALWAYS** unplug the unit before beginning any work
 - Allow the unit to cool completely if recently used
 - Work in a well-lit area with proper tools
-

Installation Steps

1. Power Disconnection

Unplug the unit from the power source.

2. Access the Unit

Remove the wiring access panel from the hopper to access the hopper fan in the mechanical area inside the hopper burner assembly.

3. Disconnect Fan Wiring

Disconnect the two fan wiring connectors from the wiring harness.

4. Remove Combustion Blower

- Remove the 4 mounting screws holding the fan in place.
- Pull the fan assembly away from the motor area.

5. Install the New Fan

- Insert and position the new blower onto the burner assembly in the same orientation as the old fan.
- Secure the fan with the previously removed mounting screws.

6. Connect Blower Wiring

Connect the two wiring connectors from the new hopper fan to the wiring harness.

7. Final Assembly

Reinstall the wiring access panel onto the hopper.

8. Power Connection

Connect the grill to the power source with the power cord.

Post-Installation Check

- Verify all connections are secure
 - Test blower operation before closing panels
 - Check for any unusual noises or vibrations
-

Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our contact form.
