## Convection Blower Assembly

### INSTALLATION INSTRUCTIONS

---

#### Before Installing

- **ALWAYS** unplug the unit before beginning any work
  - Allow the unit to cool completely if recently used
  - Work in a well-lit area with proper tools
- 

#### Installation Steps

##### 1. Power Disconnection

Unplug the unit from the power source.

##### 2. Access the Unit

Locate the blower assembly, this blower should generally be mounted on the rear side of most units.

##### 3. Remove Old Blower

- Unfasten and remove the thermostat sensor wired to the old blower
- Unscrew the mounting bolts holding the blower in place.
- Remove the old blower and mounting gasket.

##### 4. Install the New blower

- Insert and position the new blower and gasket onto the stove in the same orientation as the old blower.
- Secure the fan with the previously removed mounting bolts.
- 

##### 5. Final Assembly

Secure the new thermostat sensor to the stove with the previously removed mounting screws.

## 6. Power Connection

Connect the grill to the power source with the power cord.

---

### Post-Installation Check

- Verify all connections are secure
  - Test blower operation before closing panels
  - Check for any unusual noises or vibrations
- 

## Support

If you encounter any issues during installation, consult your owner's manual or contact technical support via our contact form.
